

CESSNOCK

COMMUNITY STRATEGIC PLAN

Journey Through Time, created by local school students and artist Steven Campbell.

Acknowledgement of Country

Cessnock City Council acknowledges that within its local government area boundaries are the traditional lands of the Wonnarua people, the Awabakal people and the Darkinjung people. We acknowledge these Aboriginal peoples as the traditional custodians of the land on which our offices and operations are located, and pay our respects to Elders past and present. We also acknowledge all other Aboriginal and Torres Strait Islander people who now live within the Cessnock Local Government Area.

INTRODUCTION

Introduction

How to read this plan

Together Cessnock 2040 is presented in 5 overarching Objectives. Within each outcome are statements on what our community would like for our city over the next ten years and how we will get there. Our plan includes a list of partners that can help deliver each theme, as well as how we will know we are on track, and how we will measure this.

Together Cessnock 2040 is prepared by Cessnock City Council on behalf of our community in accordance with requirements of the *Local Government Act*.

Mayor's message

Daniel Watton

We are lucky to live and work in the Cessnock local government area. From world-class wineries to our beautiful open spaces, and our popular community events and facilities – is it any wonder more people want to join this resilient community?

Rapid population growth means we need to keep pace with evolving needs and wishes. In this document, *Cessnock 2040*, Council has used its ongoing dialogue with the community to map our way to a bright future as that evolution takes place.

Extensive consultation is the foundation of this Community Strategic Plan. It began more than two years ago and resulted in

five key objectives: 'Live', 'Thrive', 'Protect', 'Move', and 'Lead'.

These objectives, along with the top priorities of 'Roads', 'Costs', and 'Recreation & Leisure', which were identified by the community, will loom large in Council's decision-making for the next decade.

Cessnock 2040 is one of our most important tools to ensure Council continues to be effective in providing for our growing community. It will show us what success looks like, and how to measure it, so we can remain focused on delivering all we need to continue enjoying this wonderful part of the world together.

General Manager's message

Ken Liddell

Cessnock 2040 encapsulates the common vision of Cessnock City Council, the local community, and other important stakeholders beyond the next decade, and will serve as a map to guide us into the future.

This Community Strategic Plan will be a crucial tool in steering this local government area as we plan for the years ahead. It will provide the framework we require to deliver services and facilities this community needs as its population continues to rapidly grow, and it will direct Council projects, including vital road and infrastructure works, as we move towards sustainability.

The community's top priorities for the next 10 years have been made clear through extensive consultation, which Council started in early 2023. From this dialogue, involving people from all parts of our vast local government area, we now have a plan to achieve those goals as well as agreed-upon metrics and benchmarks to ensure we remain on target.

Cessnock 2040 is the result of ongoing collaboration with the community and other stakeholders, and embodies Council's continued commitment to move forward in a spirit of partnership and a shared vision for the future.

The Cessnock Local Government Area

Cessnock City is located in the Hunter Valley, New South Wales, about 120 kilometres north of Sydney, 58 kilometres southwest of Newcastle Airport and approximately 40 kilometres west of The University of Newcastle and the Port of Newcastle.

Our area is located on the traditional lands of the Wonnarua people, the Awabakal people and the Darkinjung people and has a rich Indigenous heritage with many towns, villages, and localities bearing Aboriginal names including Kurri Kurri (meaning “the beginning” or “the first”) and Wollombi (“meeting place” or “meeting of the waters”).

Our area’s local biodiversity is significant, both in the Hunter Valley and NSW, with more than 65 threatened species of plants and animals, including nine endangered ecological communities. Critically endangered species, including the Regent Honeyeater and Swift Parrot use our local bushland for food and shelter. The Regent Honeyeater is also known to breed here. Listed as critically endangered, the North Rothbury Persoonia (*persoonia pauciflora*), is only found in a small area in North Rothbury.

European settlement dates from the 1820s when pastoralists arrived using land mainly for farming, market gardening and timber getting. The Great North Road was constructed in the 1830s, linking the Hawkesbury and Hunter Valleys.

The township of Cessnock developed from 1850 as a service centre at the junction of the Great North Road. Significant development in Cessnock occurred when coal was struck in 1892 and several coal mines were established.

Changes to the mining industry led to the closure of the vast majority of mines, resulting in a decline in population in many villages and townships, especially since the 1980s. Many areas have undergone a change in character, with rural residential housing developments becoming popular.

There has been a rise in the wine and tourism industry, with many vineyards at Allandale, Mount View, Pokolbin and Rothbury, as well as small cottages and farms used mainly as weekend retreats.

Our Community Vision

Cessnock is a cohesive and welcoming Community living in an attractive and sustainable rural environment.

There is a diversity of business and employment opportunities supported by accessible infrastructure and land services which effectively meet community needs.

**OUR
ACCOUNTABILITY**

Our Accountability

Our path to reconciliation

We are committed to building unity and respect between Aboriginal and Torres Strait Islander peoples and other Australians. We recognise Aboriginal and Torres Strait Islander peoples as Australia’s First Peoples and respect their connections to lands, waters, places and cultures. We acknowledge that within our city boundaries are the traditional lands of the Wonnarua people, the Awabakal people, and the Darkinjung people. We aim to create a welcoming community where the histories, cultures, knowledges, achievements and aspirations of Aboriginal and Torres Strait Islander peoples are acknowledged, respected, considered and celebrated.

We support the national objectives of closing the social, economic and health gaps between Aboriginal and Torres Strait Islander peoples and the broader Australian community and achieving reconciliation in Australia. We will ensure reconciliation is alive in our City by walking together along our two paths to increase our understanding and appreciation of Aboriginal and Torres Strait Islander cultures and current issues.

Supporting an accessible and inclusive community

Building positive attitudes

Accessible systems, information or processes

Supporting meaningful employment

Creating liveable communities

Communities that are accessible and inclusive provide greater choice and control for individuals and are vital to enabling people with disability the opportunity to participate equally in community life.

We recognise that barriers people with disability encounter in participating in community life are not just about the individuals or their personal condition, but from the interaction between people with disability and the physical, attitudinal, communication and social barriers they face in their environment.

We play a key role in working to remove barriers so people with disability can participate equally and independently in our community. We are committed to upgrading accessibility within our community infrastructure and events by introducing systems that support inclusion. We are also committed to promoting diversity and fostering positive community attitudes, recognising the key contributions people with disability make in our community.

Our commitment to the environment

Since the 1970's the Hunter Region has experienced a changing climate with the average annual maximum temperature increasing. We are committed to net zero emissions by 2050, and we have committed to both mitigation and adaptation measures for our operations and our community. We are dedicated to facilitating community greenhouse emissions reduction and sustainable actions through factual education and advice to our stakeholders.

Our city is biologically diverse and supports a range of ecosystems, ecological communities and vegetation types including dry rainforest in the Mount View and Bow Wow area, which supports many threatened bird species. Botanists have also counted 29 species of Eucalypt near Kurri Kurri.

We are dedicated to balancing development management with the adequate protection of biodiversity to ensure the outcomes are sustainable for the future viability of both.

Supporting Local

Our local businesses are at the heart of our community. We continue to support and nurture economic activity in our area in several ways including; our 'Support Local' campaigns to boost local spending and increase engagement with local businesses, providing support to local Job Active Service Providers to improve employment and training outcomes, and engaging local supplier where appropriate when procuring goods and services.

THE FRAMEWORK

The framework

Integrated Planning & Reporting Framework

The Community Strategic Plan (CSP) is the highest-level plan that we will prepare. Its purpose is to identify our community’s main priorities and aspirations (Outcomes) for the future along with objectives, strategies and actions to achieve these goals.

All NSW local councils are required, under the Local Government Act 1993, to develop a long-term Community Strategic Plan in consultation with our community and must be endorsed by our Council.

It must:

- Identify the main priorities and aspirations for the future of our area
- Cover a minimum timeframe of 10 years
- Establish objectives and strategies towards our desired outcomes
- Address the quadruple bottom line in an integrated manner
- Give due regard to The State and other relevant state and regional plans

We must:

- Ensure our CSP is adequately informed by relevant information relating to the following issues:
- Social, environmental, economic, and civic leadership

Be based on the social justice principles:

- Equity, access, participation, and rights
- Prepare and implement a Community Engagement Strategy based on social justice principles for engagement with the local community in the development of our CSP
- Provide the Chief Executive of the Office of Local Government with a copy of our CSP (and any amendment of the plan) within 28 days of the plan (or amendment) being endorsed

Integrated Planning and Reporting framework

In order to play our part in implementing Together Cessnock 2040; we will undertake the following planning and reporting activities:

4-year Delivery Program

The 2025 – 2029 Delivery Program details all principal activities to be undertaken to meet our statutory obligations and deliver the objectives and strategies outlined in our CSP.

Resourcing Strategy

3 strategies and plans to support achievement of our CSP objectives

- Long-Term Financial Plan (LTFP)
- Asset Management Strategy (AMS)
- Workforce Management Strategy (WMS)

1-year Operational Plan

Identifies the specific annual projects and services that will be funded each year in our annual budget.

Regular Council Review

The General Manager will report each quarter on our progress in implementing our Delivery Program.

Annual report

We will prepare an Annual Report summarising our operations and initiatives for the year.

Community Research

We will undertake independent community research every 2 years to gauge our community’s perceptions of progress against our CSP.

DEVELOPING OUR PLAN

Developing our plan

Your say

Highest priority issues

1. Roads

"Prioritising infrastructure particularly roads and traffic control"

"Traffic management in the Cessnock area; the new estates are outgrowing the traffic control, congestion is a major problem including damaging the road."

"Roads near school are not safe because of speeding and disrepair"

2. Costs

"Rising cost of living in the area, specifically housing prices."

"Rising prices in food shopping and house prices, daily living expenses."

3. Recreation & Leisure

"Lack of infrastructure for community."

"More recreational activities, e.g. introduce a cinema, gated playgrounds."

"More pedestrian paths and cycleways."

Community Involvement

Our engagement activities are guided by the best practice International Association for Public Participation (IAP2) model. This is used to help us understand any changes in our community's aspirations for our future. Consultation with members of our community and stakeholders through surveys, online discussions, community events, workshops and local conversations ensured that our community had the opportunity to participate in the development of our plan. The results of this engagement were considered when formulated our community's strategic plan for the next 10 years.

February 2023	Community Satisfaction Survey	Phone survey, independently managed 400 participants
June 2023	Australian Liveability Census	Online benchmarking survey, independently run Over 15,000 responses
June to October 2024	Community Pop Ups	12 Face to Face sessions. 400+ conversations
June to October 2024	Formal submissions portal	Community comments and submissions
June to October 2024	'Have your Say' digital forums campaign	337 page visits 192 contributions
February 2025	Community Satisfaction Survey	Phone survey, independently managed 402 participants

STRATEGIC ALIGNMENT

Strategic Alignment

International Sustainable Development Goals (SDGs)

In September 2015, Australia was one of 193 countries, to commit to the Sustainable Development Goals (SDGs). These goals were developed by the United Nations in 2015 to provide a global roadmap for all countries to work toward a better world for current and future generations.

Our council has adopted the SDGs for our planning.

All stakeholders, including governments, civil society and the private sector, are expected to contribute to the realisation of these goals.

17 PARTNERSHIPS
FOR THE GOALS

Quadruple Bottom Line

Quadruple bottom line is a way for Council to make sure we address the 4 key pillars of sustainability:

Environment

Responsible design that conserves, protects and, where possible, repairs the natural environment by seeking low impact technological and nature-based solutions to support health and wellbeing.

Economic

Decisions that support long-term economic development of our community, ensuring equality and long-term benefits as well as protecting the three other pillars of sustainability.

Social

Considering the cultural, social and practical impacts for all affected by our decisions and ensuring egalitarian, positive outcomes.

Governmental

Structuring interventions in such a way that they can be effectively managed to provide maximum benefit over extended time-frames.

Community Wellness Indicators

Wellbeing relates to our quality of life and includes both a subjective evaluation of our life and our objective circumstances, such as education, health and income.

Research conducted by Deakin University found that for people to maintain a positive sense of wellbeing, they need three core elements in their lives:

Strong personal relationships

We are social beings and our relationships and connections are crucial to our wellbeing and help us thrive.

Standard of living

The ability to financially manage the life's fundamentals such as eating, accommodation and socialising provide us with a sense of security.

Achieving in life

Our wellbeing hinges on doing things that create meaning in our lives.

Inclusion, fairness and equity <i>Overall life satisfaction</i>				
Healthy	Secure	Sustainable	Cohesive	Prosperous
Healthy throughout life <ul style="list-style-type: none"> Life expectancy Mental health Prevalence of chronic conditions 	Living peacefully and feeling safe <ul style="list-style-type: none"> Feeling of safety Experience of violence Childhood experience of abuse Online safety National safety Access to justice 	Protect, repair and manage the environment <ul style="list-style-type: none"> Emissions reduction Air quality Protected areas Biological diversity Resource use and waste generation 	Having time for family and community <ul style="list-style-type: none"> Time for recreation and social interaction Social connections Creative and cultural engagement 	Dynamic economy that shares prosperity <ul style="list-style-type: none"> National income per capita Productivity Household income and wealth Income and wealth inequality Innovation

Measuring What Matters framework

Community Resilience

Resilience is the capacity of individuals and communities to prepare for, respond to, recover from, and adapt to challenges (including natural hazard events) in ways that support healthy levels of wellbeing over the long-term. Resilience empowers individuals, communities, organisations and systems to thrive in the face of adversity, adapt to change, and effectively navigate the complexities of our interconnected world.

For more information, see [Exploring community resilience in Australia](#)

NEW AND EMERGING ISSUES

Asset Management

Cessnock has continued to experience solid population growth rates. Our area’s current growth rate is one of the highest of all New South Wales. We have adopted asset management policy and strategies to manage our public assets. These documents inform the Long-Term Financial Plan that sets the funding levels for renewal and maintenance works over a 10-year period. Our approach is to fund natural asset consumption or deterioration to gradually improve the overall network and portfolio condition over time while balancing risk and level of service.

Housing Diversity

Shelter is a basic human need, and issues around housing access impact our wellbeing. Housing affordability and availability has become a major issue across Australia and an indication of the seriousness of this problem is the number of people experiencing housing stress. Forecasts show that our population is set to grow to 115,696 by 2046, stimulating demand for new dwellings.

Our vision is that our community’s housing needs are met and lifestyle aspiration are achieved. We will work to provide a mix of affordable, diverse and sustainable options and a supported community housing sector.

Circular Economy

Governments worldwide are embracing the circular economy and creating policies to encourage circular practices.

In Australia, the Product Stewardship Centre of Excellence is developing policies and solutions that assist with management of the environmental and social impacts of products throughout their life cycle.

A circular economy is about changing the way we produce, assemble, sell and use products to minimise waste, and to reduce our environmental impact.

The benefits of a circular economy for our community is about

- Getting as much use out of products and materials as possible
- Reducing the amount of waste we generate

For more information, see [Hunter JO December Circular Economy Update – Hunter Circular](#)

Cyber Security

Effective cyber security, robust risk controls and strong information management are central to maintaining the confidence and trust of our community and stakeholders. A strong framework for managing information security and cyber risks is a pre-requisite in a modern digital environment. We are working with the NSW and Australian Government to further develop our cyber security capabilities through the national cyber security centre and continue work with stakeholders to promote and grow cyber security capabilities by implementing the digital standards for cyber security.

Secure

Our systems are secure and resilient to evolving cyber threats. Non-negotiable minimum security standards are applied across our council

Integrated

Coordinate and collaborate with our partners within a federated framework

Responsive

Maintain a strong and timely response to cyber threats and incidents. Our staff Capabilities are lifted through training and support

COLLABORATION, INFLUENCE AND SUPPORTING STRATEGIES

Collaboration, influence and supporting strategies

Achieving our community outcomes requires commitment from all levels of government, business, industry, organisations, institutions and our community.

Our influence

Our Council takes a leading role in the implementation of our CSP however, it is not wholly responsible for its implementation. It requires collaboration and advocating with other levels of government, industry and communities to achieve our long-term goals.

DELIVER	As part of our core business, we provide these services and assets and will continue to regulate activities as required by our legislations	<ul style="list-style-type: none">• Building and maintaining local roads• Providing swim centres and lifeguards• Running community support programs
PARTNER	We will support and partner with all stakeholders to deliver benefits and services to the community	<ul style="list-style-type: none">• NSW State Emergency Service• NSW Police• Hunter Water• Providing grants to our community run events
ADVOCATE	We will continue to influence others to create positive change for our community through advocacy	<ul style="list-style-type: none">• Advocating to Transport for NSW for public transport option• Advocating at a State and Federal level for funding in our area to secure affordable housing in our city

We will continue to identify those issues we can control, where we can influence outcomes and where influence may be limited but there are opportunities to advocate and educate.

Service delivery

In 2022 the Office of Local Government introduced continuous improvement as a requirement of the IPR framework, which focuses on ways to better meet our community’s expectations around priorities and service levels.

It is our commitment to introduce a Service Delivery Framework that ensures our services are Appropriate, Effective, Efficient and are to a standard guided by our community.

A photograph of three young children standing on a wooden play structure at a park. The child on the left is a girl with blonde hair wearing a blue t-shirt with a rainbow graphic, a blue cape, and a unicorn headband with a rainbow horn and colorful flowers. The child in the middle is a boy wearing a black Batman mask, a black cape, and a blue t-shirt with a Batman logo. The child on the right is a girl wearing a white t-shirt, pink shorts, and a unicorn headband with a rainbow horn and a long, flowing rainbow mane. All three children are smiling and have their right arms raised in a celebratory gesture. In the background, there is a wooden play structure with a green roof and a sign that says 'UNICORN'. The scene is set outdoors with trees and a grassy area in the background.

OUTCOME

1

LIVE

*We are connected,
safe and creative*

Outcome 1 – Live

We are connected, safe and creative

This objective relates to community wellbeing, connectedness, and safety. Community engagement participants continue to express the desire for a healthy, active, engaged, and cohesive community that maintains its unique local identity and friendliness into the future.

OBJECTIVE	STRATEGIES: 4 YEAR PLAN
1.1 Encourage social connections and wellbeing	1.1.1 Our neighbourhoods have a variety of spaces, activities and programs that connect us
	1.1.2 Strengthen outcomes for young people to make our city a vibrant place of opportunity
	1.1.3 Support a diversity of housing typologies and configurations that respond to the characteristics of our existing and future community
	1.1.4 Improve opportunities for people with disability to access services, activities, facilities and information
1.2 Strengthen community culture	1.2.1 Build unity and respect between Aboriginal and Torres Strait Islander peoples and other Australians
	1.2.2 Recognise Aboriginal and Torres Strait Islander peoples as Australia’s First Peoples and respect their connections to lands, waters, places and cultures
	1.2.3 Provide a variety of interment options for our community
1.3 Develop an active and creative community	1.3.1 Develop and deliver the Performance Arts Culture Cessnock programs and events
	1.3.2 Implement accessible, creative and innovative projects and programs in our area
	1.3.3 Provide recreation and open space facilities that are connected and well utilised
1.4 Foster safe communities	1.4.1 Participate in collaborative partnerships to assist with crime prevention
	1.4.2 Ensure we have a series of initiatives which assist with connection and facilitate greater resilience for our community before, during and after natural disasters

Our Measures

SERVICE MEASURE (BENCHMARK)		SOURCE	METHODOLOGY	DESIRED TREND
Community engagement with community events	This score is 37% in 2022. NSW score is 50%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This is a measure of a person's social ties in their local community. While these types of relationships are not as close as those with friends and family, they provide many important types of support. These could include access to useful information, knowledge, and skills. Community engagement – community events is measured using a survey item that asks participants to rate 'How often do you attend community events such as farmers markets, community festivals?' on a scale from 1 (never or almost never) to 7 (all the time)	Maintain and improve
Community Liveability	This score of 70% in 2022. NSW score is 71%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This indicator measures the overall liveability of a community by identifying what proportion of its residents would recommend their community to others as a good place to live. Liveability of community was measure through a survey item that asks participants how strongly they agree or disagree with the statement "I recommend my community to others as a good place to live", rating on a scale from 1 (strongly disagree) to 7 (strongly agree).	Maintain and improve
Crimes rate	This figure is 13,386 in 2021	Bureau of Crime Statistics and Research	This measure is the overall crime rate as measured by the number of reported offences per 100,000 population. The most common type of crime in Cessnock is breach bail conditions. In 2021 Cessnock was 14% safer than all NSW suburbs and has a low safety profile according to our scoring systems.	Reduce
Perception of Local Crime	This score is 22% in 2022. NSW score is 36%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This indicator measures individuals' perceptions of local crime and safety. Perceptions of local crime levels is measured based on a series of survey items that asks participants to rate the extent to which crime is a problem/challenge in their community at the moment on a scale from 1 (not a problem) to 7 (very big problem).	Reduce

OUTCOME

2

THRIVE

*We have a diverse
and resilient economy*

Outcome 2 – Thrive

We have a diverse and resilient economy

This desired outcome identifies the need to attract a diverse range of businesses, industries, and services together with improved access to education, training, and employment opportunities to ensure we have a sustainable and prosperous economy into the future.

OBJECTIVE	STRATEGIES: 4 YEAR PLAN
2.1 Diversify and grow our area and its economy	2.1.1 Support activation of commercial centres, business engagement, promotion and growth of business in our area
	2.1.2 Create a skilled and employment-ready workforce within our Council
	2.1.3 Support investment in facilities, infrastructure and services to support business growth and increased output in our area
	2.1.4 Ensure our level of community contributions are reasonable and meet our demands
2.2 Develop sustainable employment opportunities	2.2.1 Implement accessible education projects and programs in our area
2.3 Increase tourism and visitation opportunities	2.3.1 Promote and grow the Hunter Valley Visitor Information Centre
	2.3.2 Encourage a variety of niche tourism opportunities
	2.3.3 Explore opportunities for the construction of the Richmond Vale Rail Trail and additional Shiraz to Shore connections

Our Measures

SERVICE MEASURE (BENCHMARK)		SOURCE	METHODOLOGY	DESIRED TREND
Education	This figure is 46.4% in 2021	ABS Census	This measure is the percentage of the population with post school qualifications (degree, diploma or vocational). The benchmark for Regional NSW in 2021 is 50.9%	Maintain and improve
Unemployment rate	This figure was 5.6% in 2021	ABS Census	This is the measure of residents actively seeking employment but unable to find work. The benchmark for Regional NSW is 4.6% in 2021	Reduce
Tourist visitation and expenditure	These figures are 1,050,000 visitors \$294m spend in 2024	Destination NSW and Tourism Research Australia's National Visitor Survey and International Visitor Survey	This measure is the total number of visitors (overnight and day trips) and their total expenditure in the local government area. In 2024 this was 1,050,000 visitors \$294m spend	Maintain and improve

OUTCOME

3

PROTECT

We have a healthy and sustainable environment

Outcome 3 – Protect

We have a healthy and sustainable environment

This desired outcome focuses on the conservation and preservation of the natural environment whilst balancing development and acting on climate change. It supports our aspiration to achieve a sustainable, resilient, and healthy community and environment.

OBJECTIVE	STRATEGIES: 4 YEAR PLAN
3.1 Protect our biologically diverse natural environment	<div>3.1.1 Strengthen and protect a high quality, sustainable lifestyle for Cessnock’s residents and visitors</div> <div>3.1.2 Protect and enhance our lands of environmental value</div> <div>3.1.3 Manage disaster risk and preparedness for extreme weather events</div>
3.2 Balance our natural environment and the rural character of our area	<div>3.2.1 Ensure our area’s growth enhances and protect our unique location</div>
3.3 Effectively utilise our open spaces for both passive and active recreation options	<div>3.3.1 Provide options for people of all abilities to support active and healthy lifestyle habits</div>
3.4 Undertake viable resource recovery and waste management	<div>3.4.1 Provide a sustainable and cost-effective recycling service which prioritises waste minimisation</div>

Our Measures

SERVICE MEASURE (BENCHMARK)		SOURCE	METHODOLOGY	DESIRED TREND
Council's geographic information system	16,675 lots 80.0%	Council's geographic information system	This measure is the number of lots zoned residential within 500m of open space and green corridors. This measure identifies the number and proportion of residents with access to open space for passive and active recreation purposes. In 2021 these figures were 16,675 lots at 80.0%.	Maintain
Community Satisfaction with parks and recreation areas	In 2025 this score was 84% 3.59 - satisfied	Micromex Community Survey	A core element of this community survey was the rating of 41 facilities/services in terms of Importance and Satisfaction. Score = somewhat satisfied/satisfied/very satisfied Scale: 1 = not at all satisfied, 5 = very satisfied	Maintain
Kerbside collection recycling	In 2024 this was 39%	Hunter Resource Recovery	This is the total tonnes diverted from landfill when compared with all waste streams collected and handled within the LGA.	Improve
Kerbside organic collection	In 2024 this was 6,293.14 tonnes per annum	Australian Native Landscapes	This is a measure of the number of tonnes recycled and re-processed via the kerbside organics collection service.	Improve
Ecosystem Service	The score is 83% in 2022. NSW is 84%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This indicator examines whether local amenity is changing through monitoring whether the proportion of people who like the landscape and surrounds they live in is changing. Local amenity – environment and surrounds is measured through a survey item in which people are asked to rate how much they agree or disagree with the statement 'I like the environment and surrounds I live in', on a scale from 1 (strongly disagree) to 7 (strongly agree).	Maintain
Natural Hazard Resources	This score is 43% in 2022. NSW score is 50%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This indicator is a simple measure of the level of community cohesion after a natural hazard event. Community cohesions after natural hazard events is measured in a survey item that asks participants to rate how much they agree or disagree with the statement "The process of recovering from disaster has caused tension or disagreement between some people in my community" on a scale from 1 (strongly disagree) to 7 (strongly agree).	Maintain

OUTCOME

4

MOVE

We have accessible and reliable infrastructure, services and facilities

Outcome 4 – Move

We have accessible and reliable infrastructure, services and facilities

This desired outcome relates to community wellbeing, connectedness, and safety. Community engagement participants continue to express the desire for a healthy, active, engaged, and cohesive community that maintains its unique local identity and friendliness into the future.

OBJECTIVE	STRATEGIES: 4 YEAR PLAN
4.1 Progress our transport links	4.1.1 Support local industry and tourism and the related workforce, within our area by increasing transport options to and from our Vineyards District
	4.1.2 Provide and maintain a range of shared pathways that connect our community
	4.1.3 Provide adequate road networks in new urban release areas Infrastructure
4.2 Improve our road network	4.2.1 Ensure our existing road network remains contemporary and meets our community's needs
	4.2.2 Explore opportunities for the construction of the Bellbird North Bypass from Mount View Road to Wine Country Drive
4.3 Ensure our transport and freight networks limit impacts on our environment	4.3.1 Ensure our transport planning is integrated with land use planning

Our Measures

SERVICE MEASURE (BENCHMARK)		SOURCE	METHODOLOGY	DESIRED TREND
Community Liveability	This score of 70% in 2022. NSW score is 71%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This indicator measures the overall liveability of a community by identifying what proportion of its residents would recommend their community to others as a good place to live. Liveability of community was measure through a survey item that asks participants how strongly they agree or disagree with the statement “I recommend my community to others as a good place to live”, rating on a scale from 1 (strongly disagree) to 7 (strongly agree).	Maintain and improve
Access to infrastructure and services – local roads	This score was 11% in 2022. NSW score is 37%	Community Resilience Insights https://communityresilienceinsights.org.au/nsw/map/	This is a self-reported measure of local road quality, having regard to the quality that is needed to support local residential and business activity and which is maintained in a useable and safe state over time. Quality of local roads is measured through a survey item that asks participants to rate ‘how good or poor is the quality of local roads in your region at the moment’. Responses were measured on a 7-point scale from 1 ‘very poor’ to 7 ‘very good’.	Improve
Asset Maintenance Renewal	Asset maintenance ratio in 2024 this score 32.89% Asset renewal ratio in 2023 this figure was 17.92%	Council’s infrastructure asset performance indicators	This ratio provides a snapshot of the proportion of outstanding renewal works compared to the total value of assets under Council's care and stewardship	Maintain
Community satisfaction with maintenance of our sealed roads	In 2025 this score was 25% 1.92 – Not at all satisfied	Micromex Community Survey	A core element of this community survey was the rating of 41 facilities/services in terms of Importance and satisfaction. Score = somewhat satisfied/satisfied/very satisfied. Scale: 1 = not at all satisfied, 5 = very satisfied.	Maintain to benchmark
Community satisfaction with regulation of traffic flow	In 2025 this score was 54% 2.70 – Somewhat satisfied	Micromex Community Survey	A core element of this community survey was the rating of 41 facilities/services in terms of Importance and satisfaction. Score = somewhat satisfied/satisfied/very satisfied. Scale: 1 = not at all satisfied, 5 = very satisfied.	Improve

Scale: 1 = not at all important/not at all satisfied, 5 = very important/very satisfied.	Improve

MEASURING PROGRESS

Measuring progress

Together Cessnock 2040 belongs to all of our residents and relies on each of us to achieve the outcomes we seek in the future. Monitoring our progress is important.

We have included two levels of monitoring to assist us with tracking how effective our strategies are in working towards our long term planning, and our community's desired outcomes.

Success Indicators

These annual indicators help us to identify at an operational level how effective each of our strategies is.

Service Measures

Where possible we have also included empirical data sourced from various places such as our Biannual Community Satisfaction Survey, the Australian Bureau of Statistics and our own Council record keeping mechanisms to assist us with measuring our long term performance. Whilst these Service Measures are useful, these indicators are not wholly within our control. They are, however reflective of our community's profile and include a desired trend we would like to achieve for our community.

State of our City

Every 4 years we will produce a report which outlines our achievements towards Together Cessnock 2040 and track any changes for the community, economy, and environment.
